

Running Guide

Requirements

- Node.js 22+
- PostgreSQL
- npm

Clone Repository:

```
git clone https://github.com/milindasandaru/EN2H-NestJS-Assignment.git
cd EN2H-NestJS-Assignment
```

Install Dependencies:

```
npm install
```

Configure Environment:

Create .env

Using .env.example

Generate Prisma Client:

```
npx prisma generate
```

Run Migrations:

```
npx prisma migrate dev
```

Start Application:

```
npm run start:dev
```

Swagger:

<http://localhost:3000/api/docs>

Docker:

```
docker compose up --build
```

Testing Authentication:

Register

POST

/api/auth/register

Login:

POST

/api/auth/login

Copy the JWT token.

Authorize Swagger:

Click

Authorize

Paste

Bearer YOUR_TOKEN

Test Services:

Create

Get

Update

Delete

Test Bookings:

Create Booking

Update Status

Cancel Booking

Pagination

Search

Filter

Done.

Probably 3–4 pages.

How to create them quickly

I wouldn't spend time designing documents in Word from scratch.

Do this:

1. Create two Word documents.
2. Copy the content above.
3. Add:
 - Your name
 - Date
 - Assignment name
4. Save as PDF.
5. Upload both to Google Drive.
6. Set sharing to Anyone with the link can view.
7. Paste the links into the form.
